"technology for people..."

www.virtualcharity.co.uk

Your Own Intranet

With the Virtual Charity solution you get your own Intranet; private web pages that only your staff or those you authorise can view.

Accessibility

Accessibility is an important and of the moment issue with websites.

With a Virtual Charity solution website users get the option of a high contrast large text style. Creating accessible websites is important for everyone.

Enquiry Handling

Enquiries can be taken online and are permanently stored in your database as well as forwarded to an email address of your choice.

Discussion Board

Those supported by a charity can often feel isolated. The discussion forum in a Virtual Charity website can enable people to share their experiences.

Security

Security is a crucial concern with websites. Much diligence has been applied in the

development of the comprehensive privilege system enabling you to set different levels of access for members of your staff.

News Extra

For a website to be truly useful as a communication tool the information has to be current. The News Extra facility allows you to highlight important events or information.

Update Your Own Pages

With our easy to use Content Management System you can change the text on your web pages and upload pictures with no technical expertise.

Simple changes such as spelling mistakes can be corrected in seconds without the need to wait for an IT professional to carry out the required changes for you.

Future Proofed

Our solution is future proofed, you get enhancements free of charge and you benefit from the ideas and initiatives of others in the Charity & Voluntary Sector.

Online Donations

Once you have a popular website you can take advantage of the traffic by accepting donations online

from major credit cards or PayPal.

Project Management

We all know it's people rather than technology that really make things happen. Our project management expertise will ensure your project will run smoothly and timely.

Training

Whilst the system is simple to use, many find computers difficult, so to ensure you get the most out of Virtual Charity we provide training.

Training is delivered by our qualified trainers at your premises.

Telephone Support

To provide you with reassurance expert telephone support is provided as part of our agreement with you.
